

Milling plant in extrusion line for double-walled ducts in a max. 600 mm width.

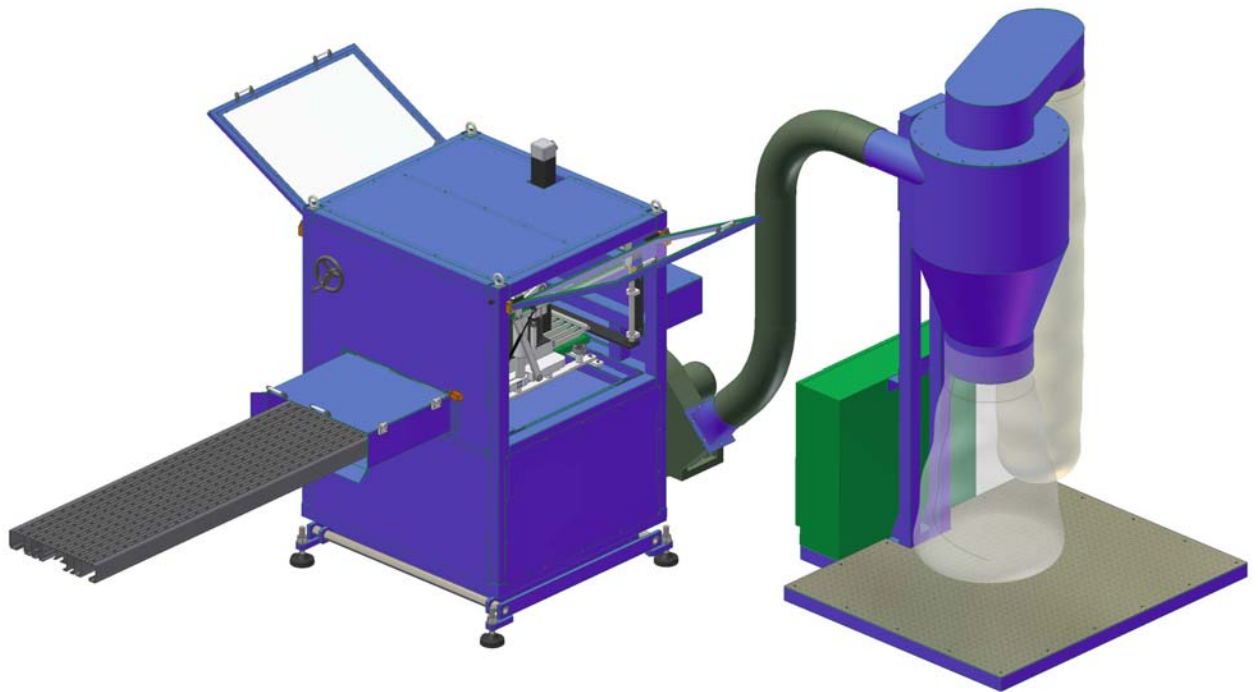

Dear Sirs,

We have pleasure in informing you that we are completing a milling plant equipped with 44 milling heads which work simultaneously to process double-wall ducts with a max. width of 600 mm directly in the extrusion line.

We would like to remind you that we are world leader with regard to this kind of plants, thanks to the experience acquired in over 50 years of activity and to the high number of machines we have supplied to the main duct producers on an international scale.

We think that this demonstration could be a very interesting opportunity for you, not only to visit our company and check the above-mentioned plant, but also to see the state of the profile technology art.

In addition to the standard plants we have also manufactured varied customized machines, planned following the specific customers' requirements. For further details and general information on our company, as well as our products, we invite you to visit our website www.baruffaldi.eu.

We would be delighted to welcome you in our company in APRIL and show you the working plants.

Looking forward to your kind answer, we send you our best regards.
